We shall have no liability for losses or damages (whether direct, indirect, consequential, or any other kind of loss or damage) arising out of use, reference to, or reliance on the contents of this whitepaper, even if advised of the possibility of damages arising. No regulatory authority has examined or approved any of the information set out in this whitepaper. No such action has or will be taken under any jurisdiction’s laws, regulatory requirements, or rules. This whitepaper’s publication, distribution, or dissemination does not imply that applicable laws or regulatory requirements have been complied with. This whitepaper contains forward-looking statements or information (collectively “forward- looking statements”) related to our current expectations of future events. We have based these forward-looking statements on current projections about future events and financial trends that we believe are relevant to our financial condition, results of operations, business strategy, financial needs, or the token sale results.

2. INTRODUCTION

WHY BLOCKCHAIN?

Have you ever questioned why Blockchain is essential or noticed how it is impacting our daily lives? We are approaching a crucial moment in discovery. Until now, centralization has been a prerequisite for all of our official compositions. Political, educational, and financial systems are, and have always been, crafted in a way that does not equally and ethically distribute power to those operating within them.

There have been points in our history where centralized structure played an instrumental role, but in this information age, it is time to rethink. A blockchain is a ledger-based peer-to-peer network where each peer has a ledger copy. This drives the decentralized idea into the people's minds which is why it is prevalent among the general audience.

TRANSPARENCY

Blockchain provides transparency due to its nature. It is helpful for different functions of our society as it ensures that the end-user interacts with processes transparently.

FREEDOM

One of our inalienable rights is freedom. There are centralized entities that offer connectivity in terms of economy, but Blockchain only provides true digital freedom.

DECENTRALIZED SERVICES

Decentralized services are the backbone of our future society. Be it any service or management, there will be decentralized services.

USE-CASES

Blockchain is a technology for the future of our society. It can be applied in any industry, including trade, finance, banking, government, education, healthcare, etc.

SECURITY

Blockchain uses cryptography to add a layer of security. Cryptography utilizes complex mathematical algorithms that are used to secure the data and systems on the blockchain network.

COST OF SERVICE

Blockchain is inexpensive when compared to traditional systems. The removal of centralized authority, in turn, removes the middleman and improves cost-efficiency.

2. INTRODUCTION

TRADERVERSE

At TRADERVERSE INC, we believe information is power, especially for traders. Regardless of whether one trades cryptocurrencies or stocks, the correct knowledge will help traders succeed. With the invention of Robinhood, Stocktwits, Twitter's Fintwits, and Webull, social media has risen in popularity to become the platform that many use to influence and share critical information with traders. Nevertheless, traditional social media was not designed to cater to trading or traders, and contains many flaws, specifically a lack of control and quality, leading to biased and manipulated content, ultimately victimizing new traders. Our executive team (Sarim Alavi, John Forster, Michael Herman, and Milly Barker Destefano) are on a mission to improve the trading community by promoting transparency, accessibility, and teamwork by providing exceptional tools for information analysis and effective collaboration. Thus, the birth of the TRADERVERSE ECOSYSTEM.

The TRADERVERSE ECOSYSTEM consists of multiple platforms tailored to support modern day traders with our core products, TRADERVERSE Social, an intelligent and transparent Traders' Social Network with built-in analysis tools, and TRADERVERSE Streams, an educational audio/video and live streams network with the community and insights built-in.

3. ECOSYSTEM

FEATURES

TRADERVERSE Social provides a place where traders share information and resources to educate each other—connecting numerous traders on a single social network. It uses Tradenion at its core, an intelligent AI-based information services platform that processes information for various sources in real-time and produces informational insights. The platform enables users to write, organize, store, and share research, technical analysis, and social insights, including charting, technical, social, news, and fundamental alerts.

TRADERVERSE Stream is an Audio, Video, and Live Streaming service dedicated to the education and engagement of its community. It directly engages the community by bringing awareness to social content, including relevant market trends, technical and fundamental analysis, respected thinkers, CEO interviews, trading strategies, and much more. Our mission is to provide a plethora of creative influencer content to support the learning & education of the trading community. Built in-rooms allow traders to converse with like-minded individuals in the trading sector.

TRADERVERSE ECOSYSTEM is a platform created by retail traders and for retail traders to create a community and promote transparency, accessibility, and teamwork for all traders. Our token holders can purchase SaaS subscriptions with their TAKEOFFTOKEN or Fiat currency.

3. ECOSYSTEM

STREAMS

A multi-tenant, well-structured Audio, Video, and Live Streaming app dedicated to the education and engagement of its community bringing awareness to social content..

MARKET

Our e-commerce ecosystem is where creators and consumers can interact and transact with a vast amount of content and merchandise offered by both creators and Tradaverse.

COLONIES

Decentralized groups that allow individuals to meet and interact with like minded traders to share ideas, insights, and trades with an embedded AI analysis and charting assistant.

TRADENION

An intelligent assistant that performs deep analysis using Artificial Intelligence and Machine Learning capabilities to understand patterns and produce incredible insights.

CLOUD DOCS

Intuitive and easy-to-use shared note taking, storage and research tools to make deep diving into any company, ticker, currency, or other asset straightforward and collaborative.

COMET CHARTS

A proprietary charting platform embedded in our Social Media ecosystem where all traders, investors, educators, and market enthusiasts can share ideas and analyses.

TRADERVERSE ECOSYSTEM

4. TAKEOFFTOKEN

THE TOKEN

TAKEOFFTOKEN is a unique ERC 20 token build to integrate and excel with TRADERVERSE ECOSYSTEM. Forming a special 2-way relationship, they support each other's growth and stability creating increased benefit for token holders. Collectively, it will allow in-ecosystem purchases and donations between members and creators, as well as allowing users to buy SaaS subscriptions. They will fuel the community with features that will ultimately empower traders.

TAKEOFFTOKEN integrates itself in the fabric of the TRADERVERSE ECOSYSTEM, enabling members to perform various e-commerce transactions efficiently. Each blockchain transaction brings transparency and promotes collaboration, while rewarding influencers and content creators. Transactions also support the tokens by generating significant volume, in essence creating more added value for holders. TAKEOFFTOKEN will launch on the polygon network for lower gas fees and faster transactions, enabling the ECOSYSTEM's true potential. It will be available on the most popular exchanges after a fair presale event on various known launchpads.

AUTO & MANUAL BURNS

An automated burn on tokens will help reduce overall supply, leading to increased token holder value. However, this burn will not be finite or controlled, so in the long term will require a review. Generally, in the long term, we prefer manual burns governed by the TRADERVERSE team; this will help create a more informed community. TRADERVERSE Network can advertise and track manual conditions and amounts. The total number of TRADERVERSE TAKEOFFTOKENS burned will be featured on our website to allow transparency in identifying the actual circulating supply at any given period.

AUTO LIQUIDITY POOL (LP)

Automatic LP is the secret ingredient of TAKEOFFTOKEN. Here we have a function that will be beneficial for holders:

- The written contract will absorb both buyer and seller tokens equally and add them to the Liquidity Pool, creating a stable price floor.
- The added LP should create stability from the supplied LP by adding part of the tax to the overall liquidity of the token.

TAKEOFFTOKEN LP increases with time, increasing the price stability with it. The idea is to prevent the higher dips when any whales decide to sell their tokens; this will help stabilize the price fluctuation. TAKEOFFTOKEN has an advantage over traditional reflection tokens, which are only beneficial in the short term from the granted supply reduction.

We are convinced that this design and protocol should prevail over the antiquated reflection tokens for the mentioned reasons.

4. TAKEOFFTOKEN

REWARDS

Get rewarded for interactions in ranks & tokens.

SUBSCRIPTIONS

Support your favorite content, apps, and groups.

TIPPING

Support your favorite influencer or shot-callers.

UTILITY & MORE

PROMOTIONS

Earn by promoting traders, brands, & projects.

DONATIONS

Donate to various causes, charities, & groups.

REFERRALS

Earn bonus points and tokens by inviting friends.

MERCHANDISE

Buy Tradaverse official & crossbrand merchandise.

MARKET

Buy, sell, & trade audios, videos, images, & docs.

5. ROADMAP

MILESTONES

AUG - DEC 21

Development and Alpha Release of TRADERVERSE Stream, Websites, and Social Development.

JAN - MAR 22

TRADERVERSE NFT LAUNCH, TAKEOFF TOKEN Private and Presale opening, and initial launch of COMMUNITY DISCORD.

JAN - MAR 22

TRADERVERSE TAKEOFF TOKEN Public launch, TRADERVERSE STREAMS Beta launch (Full token utility available in this release).

APR - JUL 22

TRADERVERSE SOCIAL beta launch, TRADENION AI COMPANION, Second NFT Drop, and TAKEOFF TOKEN integration with TRADERVERSE SOCIAL.

JUN - AUG 22

TRADERVERSE Full Ecosystem Release, MARKETPLACE, CHARTS, DOCS CLOUD, COLONIES, and STREAMS integrations.

AUG - OCT 22

TRADERVERSE STREAMS and SOCIAL IOS & Android App Release with Digital Wallet and TRADENION alerts integrations.

OCT - DEC 22

Phase Two planning, platform fixes & optimizations for TRADERVERSE ECOSYSTEM, additional Apps & Dapps Releases.

DEC 22 - FEB 23

Upgrades and updates. Additional release of features, development, support, and optimization for all Ecosystem to scale.

6. OUR PLEDGE

FAIRNESS & SUPPORT

We believe in fairness & honesty and will do our best to be transparent and keep all informed pre and post launch as well as throughout our token's life cycle. Moreover, as true innovators and believers of blockchain technology, our core development intention is to integrate TAKEOFFTOKEN & TRADERVERSE tightly together so that they both encourage mutual success.

TRADERVERSE PLEDGE

As a company that believes in transparency and giving back to the community, we will look for opportunities to help our community and token holders in every way we can. We will implement multiple features that generate profitable transactions back into our token to ensure value and to our TRADERVERSE ecosystem.

CHARITY & DONATIONS

Donating is a selfless act and necessary for our community to thrive, so we are incredibly passionate about supporting different charities and causes. We will find multiple ways to support society by using both the TAKEOFFTOKEN and the TRADERVERSE Ecosystem. By using some of these resources, technology, and platforms our project becomes a vehicle for societal good and unity. We are confident this project will do good for others and inspire many which are core tenants of a healthy and thriving community.

7. CONCLUSION

CLOSING THOUGHTS

The stock market is fluid, and complex, hence conditions and variables are constantly changing. To better adapt to the market, we at TRADERVERSE Inc. are committed to making the retail investing space more interactive, transparent, collaborative, and most importantly efficient. We truly believe that accurate information is a necessity for any trader. We will continue to innovate and create tools and features that will help the trading community.

Our goal is to empower traders and allow them to perform at their best inside a reliable and user-friendly platform that helps build a worldwide learning community that attracts members from all walks of life. Retail traders should learn from one another and work collectively toward a common goal. The TRADERVERSE team wants to promote talent and creativity bringing exceptional retail traders to the spotlight by showcasing their work for all users on our platform.

The TAKEOFFTOKEN provides our users access to our products and services. We encourage the stability of our token through the use in our TRADERVERSE ECOSYSTEM. We have built additional stability measures to support the launch of our token. There is an upper cap on the token allocation providing stability and value. Fluctuations may occur because of the supply-demand equation.
